

# SELECTING THE PROPER HOSE ASSEMBLY

In order to obtain the best service from any particular hose application, two important conditions must be fulfilled.

- 1) Select the right hose for the job.
- 2) Make sure that it is fitted correctly and used in the proper manner.

Carefully consider the application requirements. A helpful guide is the “Stamped” process. “Stamped” is an acronym and stands for the seven major information areas required to provide a quality hose assembly.

**S** **SIZE** –ID, OD, and length of the assembly

**T** **TEMPERATURE** –includes temperature of fluid conveyed and the climactic conditions

**A** **APPLICATION** –the conditions of use, including abrasion, flexing, and routing

**M** **MATERIAL** –type of material conveyed including composition and concentration

**P** **PRESSURE** –hose assembly working pressure and surge or back pressure

**E** **ENDS** –definition of the fitting including thread type, gender, bent tube, swivel and orientation

**D** **DELIVERY** –time allowed for delivery including testing, quality assurance and packaging

To assist in obtaining and conveying information regarding the application, a copy of the “Stamped” application form is included in this catalog. This inquiry sheet can be sent to any Goodyear authorized distributor for a hose recommendation.

**PLEASE NOTE:**

A hose should always be selected based on its **rated working pressure**. Do not use **minimum burst pressure** as a guideline

in selecting the hose. Minimum burst pressure decreases over the use and life of the hose. A hose should be selected based on its **rated working pressure** to provide a normal service life. In addition, always select a hose by giving consideration to its recommended temperature limits. Hose service life is reduced if the temperatures of the fluids being conveyed or ambient temperatures exceed the recommended limits.

# S.T.A.M.P.E.D. FORM

SIZE	
I.D.	
O.D.	
Hose Length (OAL or uncpld. lgth.)	
Tolerances	
TEMPERATURE	
of Material Being Conveyed (High, Low, Ambient)	
of Outside Exposure (High, Low, Ambient)	
Intermittent?	
Constant?	
Sub-Zero Exposure	
APPLICATION(S)	
Indoor and/or Outdoor Use	
Intermittent or Continuous Use	
Flexibility Required (min. bend radius)
